Dear Dr Chen,

Last month I received fantastic news and was utterly relieved when my oncologist, Professor David Goldstein (Prince of Wales Hospital in Randwick), told me I no longer had to see him anymore as I am well and completely healed now. I was under his continuous observation after completing chemotherapy for six months following my surgery, which took place almost five years ago.

I was diagnosed with Pancreatic Cancer (Adenocarcinoma of Pancreas) in September 2011 and underwent a surgery called the 'Whipple Procedure' or Pancreaticoduodenectomy immediately following the diagnosis.

I came to see you 4 weeks after my surgery and 2 weeks before started the chemotherapy as I looked for alternate treatment post surgery. You have always cared for me since I started and have continuously helped me to improve my health with your combined acupuncture and Chinese herb treatment.

I am grateful to my wife and my mother who had encouraged me to take your treatment, even during chemotherapy, which had helped me to gain strength and improve my immune system.

I sincerely thank you for looking after me with your skillful treatment. I have and will continue to recommend your treatment to anyone that needs help.

Regards,
Jeff
