

Category: Asthma

I have been suffering with acute asthma for more than 40 years. I have been controlling the symptoms using pharmaceutical medications prescribed by my various doctors over the years.

In May this year my asthma condition deteriorated to the point that I was using my Ventolin inhaler almost 10 times a day. The slightest amount of exertion would trigger shallow/laboured breathing. In addition my body was producing enormous quantities of mucous, which was exacerbating the condition. My doctor advised a course of Prednisone which is a Corticosteroid/immunosuppressant drug that simply treats the symptoms and causes havoc with the rest of the body.

In desperation, I decided to try alternative medication to see if it can provide relief and perhaps (hopefully) even a cure for the root cause of my "life long" asthma condition. I was referred to Dr Qi Chen by a colleague at work.

I am delighted to report that after a mere 3 months of acupuncture and a strict regimen of taking Chinese herbs (3 times a day) - my asthma condition improved markedly. After a further three months, I am almost 90% cured of this malady.

The quality of my life has improved tremendously, my reliance on the asthma inhaler has diminished to almost one puff a week (absolutely amazing). I am exercising daily (because I can now), I have lost 10 kilos (in 3 months), people I know have begun noticing the transformation and I have received many compliments on my appearance and generally my outlook on life is much more positive.

It is quite ironic that after a life time of ingesting pharmacy medication (which no doubt kept me functional) - my asthma condition gradually worsened and my reliance on the drugs that only treat the symptoms of the disease increased and a mere six months of ingesting Chinese herbs along with a course of acupuncture has delivered such incredible improvements to my health.

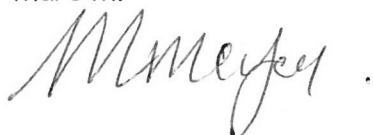

I am truly grateful to Dr Qi Chen for what he has done for me in such a short period of time.

If you are suffering from a chronic condition such as asthma or any other condition which will inevitably compromise your quality of life in the long term -

I sincerely urge you to meet with Dr Chen and allow him to treat the "root cause" of the problem and transform your health.

Kind regards

Marc M.
