To Whom It May Concern:

My name is David and I am 36 years old. My wife is 37 years of age and we have been trying to start a family for the past five years.

We began IVF treatment in 2010 where we actually became pregnant on our first round. Unfortunately we miscarried at 7 weeks. We then continued IVF treatment over the next 2 years totalling 12 rounds which were all unsuccessful.

Losing faith and hope in achieving our dream to start a family we were told about Dr Chen who practices acupuncture and Chinese herbal medicine.

We were sceptical at first as we thought that acupuncture would not help our situation considering we were unsuccessful with western medicine.

However Dr Chen reassured us that we would fall pregnant naturally if we followed his regime. He explained that it was 50% acupuncture and 50% herbs.

We began the treatment and in the short term we noticed my wifes skin beginning to clear up as she always suffered from acne.

We actually stopped IVF treatment while undergoing Dr Chan's regime. After 12 months of treatment with Dr Chen we actually fell pregnant naturally.

My wife and I could hardly believe what happened and it wasn't until our second scan that we truly accepted what had happened. At the time of writing this letter my wife was 16 weeks pregnant and showing all positive signs that we would carry through to a healthy birth.

I thank Dr Chen for his work with us. I believe it was through his treatment of acupuncture, herbal medicine, and advice on dietary intake that helped us achieve our pregnancy.

I recommend Dr Chen as a method of fertility treatment that truly works.
