

TO WHOM IT MAY CONCERN

24 September 2013

My name is Cynthia, I'm 35 years old and I've been suffering uterine fibroids since 2006. My period is always heavy and painful, especially for the first 3 days. I even became anaemic in January 2010 and had to go to hospital to receive 2 bags of blood transfusion. My gynaecologist said because the position of my uterus, they would prefer to take the whole uterus out rather than taking the fibroids only. Easy done for them but I don't want to do that as I still want to have children.

I had an idea about having herbal medicines treatment at that time and I've spoken with my gynaecologist about having that kind of treatment, but he said he does not believe Chinese medicine treatments. He said I'll be just wasting my time as it would not do me anything. He said I have to face the reality to possibly lose my uterus and not be able to have children.

In April 2012, my uterus volume became 914ml. I have multiple fibroids with the biggest one measuring 108 x 87 x 108mm with a volume of 531ml. My gynaecologist was suggesting me to undergo surgery and take the whole uterus out. I refused to do that.

Then a friend of mine suggested me to see Dr Chen for treatments as she was one of Dr Chen's patients as well.

After receiving Dr Chen's acupuncture and taking Dr Chen's pills every week for 4 months, I did ultrasound again. This time, the size of my uterus became 776ml and the size of the biggest fibroid measured 98 x 87 x 62mm. I felt so happy that Dr Chen's treatments are working well.

I continue the treatments and did another ultrasound again in June 2013. The uterus volume became 727ml and the biggest fibroid measured 91 x 76 x 74mm with a volume of 268ml. I'm so delighted because that's half the size of what it was before!!

I keep seeing Dr Chen as I know his treatments and medicines are working well for me and I know he is my only hope for me to be able to have children in the future.

I suggest to anyone who suffers uterine fibroids, please don't give up and believe Dr Chen's treatments and medicines are working.

I sincerely would like to say thank you to Dr Chen for his treatments and medicines. Without him, my fibroids could have gone bigger and I might lose the chance of having children.

Thank you Dr Chen and may God bless you always

Regards,

Cynthia
