

Errol Coles - Testimonial

September 2013

During November 1996 I was diagnosed with prostate cancer. A biopsy taken by Dr Stricker at St Vincent's Private Hospital revealed five very aggressive cancers. Being shell-shocked and after many deliberations, believing that to be my best option, I decided to have the prostate removed.

This was carried out by Dr Sticker in March 1997. All went well for two years. However, following a normal routine blood test, there was a reading on my PSA which indicated that cancer cells were still floating around in my body. Following examination by Dr Stricker (Urologist) and Dr Stevens (Oncologist) at St Vincent's Private Hospital, it was determined that cancer cells were located on the outside of the join between my urethra and bladder. This finding was very traumatic, especially not knowing if the cancer cells had spread further. On advice from my Doctors, it was decided that I would have hormone injections (quarterly for twelve months) together with six weeks of radiation treatment. This was commenced in April 1999.

It was at this time that I heard of Dr Chen, through a fellow golfer who had great success with Dr Chen's treatment. Although being very sceptical, I had nothing to lose, so I arranged my first appointment with Dr Chen.

The appointment was very different to that of a normal GP. However, having said that I left his consulting rooms with the most positive outlook. Two years of treatment by Dr Chen (acupuncture, herbal medicine, medication and diet), together with one year of Western treatment has held my body together with very good health. This continues some 14 years later.

Dr Chen's guiding and calming assurance has boosted my confidence, especially making me believe that our inner sources have very strong healing powers.

Following on, Dr Chen is now treating my wife. She has suffered acute depression and anxiety for the past 3.5 years. Treatment by Western Doctors over this time has not been eventful.

Three months has now past and Dr Chen has made inroads towards restoring my fragile wife to good health.

We still have a way to go but we are both positive of a successful outcome.

I commend Dr Chen to any person that wishes to seek his services. His professionalism and knowledge together with his assuring manner will benefit all.
