

Dear Dr Chen

It was lovely chatting with you last Friday, I miss my visits with you!!

The only good thing is that me not visiting you, means that I am healthy and well. My kidney is doing brilliantly and last appt with the renal specialist indicated that it is still as perfect as you had left it!!

My little boy Jake has now just turned 2 years old and is just gorgeous. And very smart, as you said which I think is due to all those beautiful Chinese herbs you gave me both before and after I had conceived him – another wonderful gift you have given J I have attached a photo of him just taken this week.

My mother Lina is also going well, noting it has now been over 13 years since we first met you and my mother had been diagnosed with inoperable oesophageal cancer. She is now 76 years old has been traveling through Europe since January 2013 and is currently in Croatia!!

I cannot believe how many wonderful gifts you have given me, you are an angel and I tell everybody I meet, that you are J J

God bless you Dr Chen.

Odette xxxx
